CORE CAPABILITY AREAS

- Cyber Intelligence
- OSINT
- Digital Forensics
- Application Security
- Vulnerability Assessment
- Full-Stack Development
- Secure Systems
- AI-Assisted Workflows
- Process Automation
- Data Management
- UI/UX
- Visual Communication

KEY CREDENTIALS

ISC2 Certified in Cybersecurity (CC)
November 2025

MSc Digital Forensics and Cybersecurity
Distinction · CGPA 3.75

Penetration Testing 2025
IT Masters / Charles Sturt University · 88% Distinction

Fundamentals of AI Security
Microsoft Learn · Module achievement · 2026

Dylan Owusu Afriyie

Cyber Intelligence | Digital Forensics | Cybersecurity | Software and Systems Development

PROFESSIONAL PROFILE

Cyber Intelligence Analyst on industrial attachment with the Ghana Police Service CID Cybercrime Unit, with an MSc in Digital Forensics and Cybersecurity (Distinction) and a BSc in Management Information Systems. My work covers cyber intelligence reporting, OSINT, financial tracing, digital evidence handling, mobile and network forensics, application security and incident response. I also build and deploy web and AI-assisted systems using Next.js, Supabase, PostgreSQL, Python and Vercel, with practical work in authentication, RBAC, Row-Level Security, realtime workflows, UAT and secure application design. ISC2 Certified in Cybersecurity (CC).

Cyber Intelligence and OSINT | Digital Forensics | Application Security | Vulnerability Assessment | Full-Stack Web Development | Secure Systems Architecture | AI-Assisted Workflows | Process Automation | Data Management | UI/UX and Visual Communication

PROFESSIONAL EXPERIENCE

Cyber Intelligence Analyst | Industrial Attachment Nov 2025 - Present

Ghana Police Service, CID Headquarters - Cybercrime Unit | Accra, Ghana

- Write cyber intelligence reports and investigative briefs for active cases involving online fraud, impersonation, misinformation, cyber harassment and related cyber-enabled offences, organising timelines, actor links, financial traces and technical findings for investigators.
- Conduct cross-platform Open Source Intelligence (OSINT) investigations using social platforms, public data sources and archived web content to connect accounts, infrastructure and online activity.
- Trace Mobile Money and banking flows across multiple accounts, map transaction paths, identify consolidation patterns and prepare findings that support lawful investigative processes.
- Analyse Call Data Records (CDRs), metadata, digital communications and stylometric or linguistic patterns to test links between multiple online personas and communication identities.
- Handle digital evidence with attention to metadata preservation, chain of custody and cryptographic hashing, and help prepare lawful data preservation and information-request documentation for online service providers.
- Process degraded CCTV imagery using enhancement and edge-detection techniques to recover obscured identifying details relevant to ongoing investigations.
- Evaluate mobile forensic tools including Cellebrite UFED, Oxygen Forensic Detective, MSAB XRY and GrayKey, and contribute technical reference material for investigative use.

Human Resource Co-ordinator Sep 2022 - Nov 2023

Margins Group | Accra, Ghana

- Automated recurring HR forms and tracking processes using fillable PDFs, Excel, VBA and Power Query, reducing manual handling and making records easier to follow.
- Handled sensitive employee information and supported access-control and PII-handling practices for HR records.
- Worked with HR Business Partners on recruitment tracking, onboarding and day-to-day employee administration.

PORTFOLIO
COVERAGE

- Enterprise Operations
- AI Workflows
- Operational Tools
- SME Systems
- Audio Applications
- Interactive Web
- 3D Experiences

BUILD APPROACH

Problem-first scoping, security-aware architecture, human review for AI-assisted decisions, controlled rollout, UAT, practical workflows and interface design for the people using the system.

PROJECT STATUS

This portfolio includes live deployments, controlled security labs and live prototypes. Synthetic demonstration data is labelled where used.

Software and Systems Portfolio

Deployed systems, operational tools and interactive prototypes

Mission Control

Next.js | Supabase | PostgreSQL | Tailwind CSS | Vercel | Live deployment

Built and deployed an internal operations platform covering task management, departmental workflows, SOP access, communication, financial visibility and executive oversight.

Implemented authentication, RBAC, Row-Level Security, realtime features, caching, staging and production workflows, then used structured UAT and security review to fix access-control and workflow issues before controlled rollout.

Digital Point Project Scoping Agent

Base44 Agent | Live

Built a conversational discovery agent that asks about the real business problem, users, constraints and integrations before recommending implementation scope.

Designed the flow to keep discovery problem-first and reduce premature solutioning and unnecessary feature growth.

Client Intake Intelligence

AI-assisted web application | Live

Built a public enquiry workflow that turns unstructured submissions into structured problem summaries, fit classifications and follow-up questions for staff review.

Separated public submission from protected staff and admin workflows, kept AI processing server-side and used human review before any decision is taken.

BugDesk

Authenticated defect-management application | Live

Built a lightweight defect-reporting companion for Mission Control with reporter and admin roles, status progression from Open to In Progress to Fixed, verification and closure.

Daybook GH

Ghana-focused SME record system | Live

Built a daily sales and expense tracker for Ghanaian micro and small businesses, using GHS and simple workflows aimed at non-technical users.

Used clearly labelled synthetic data for portfolio and demonstration purposes.

Personal Task Tracker

Custom workflow application | Live

Built a personal execution dashboard for tracking tasks, roadmaps and priorities without the extra features of general-purpose task managers.

Solfa-Echo

Next.js | Web Audio API | Supabase | Live

Built a relative-pitch ear-training application with browser-based audio playback, progressive exercise tiers and realtime voice calibration.

Ghanaian-Based Monopoly Game

Interactive web application | Live prototype

Built a localised digital board-game experience using Ghanaian cities and cultural references, with browser-based game-state logic for turns, ownership and gameplay.

Mock Real Estate Viewing Website

Web application prototype | Live prototype

Built a property-viewing concept with structured listing data, high-fidelity interface design and virtual-tour integration for real-estate use cases.

Three.js Photo Album

Three.js | WebGL | Live

Built an immersive 3D photo-gallery experience with spatial scene rendering, canvas interaction and dynamic visual presentation in the browser.

SECURITY PRACTICE

Mobile forensics, network forensics, digital acquisition, artefact analysis, evidence preservation, application testing, vulnerability assessment and remediation documentation.

APPLICATION SECURITY AREAS

- SQL Injection
- XSS
- Authentication Testing
- IDOR
- CVSS
- OWASP Top 10
- APK Review
- ADB
- CSP
- HTTP Hardening

RESEARCH INTERESTS

Cybersecurity Risk Management
AI Security and Cyber Analytics
Secure Software Architecture
Automated Security Testing
Mobile Forensics Methodology

Security, Forensics and Application Labs

Technical labs and academic practical work

Android Mobile Forensics - MSc Practical Project

Digital acquisition | Artefact analysis | Chain of custody

- Performed controlled Android data acquisition and artefact analysis using forensic workflows, with documented handling and chain-of-custody procedures.
- Used the work to examine acquisition choices, evidential handling and the interpretation of mobile artefacts in a controlled academic setting.

Afriyie Bank - Vulnerable Web Application Lab

Application security | OWASP testing

- Built a deliberately vulnerable banking web application to practise testing of authentication, session management and input-handling weaknesses in a controlled environment.
- Tested SQL injection, XSS, authentication bypass and IDOR, then documented proof-of-concept steps, CVSS severity and remediation aligned with OWASP Top 10 guidance.

Dylan's Image-to-PDF Converter - Secure App Lab

Flutter/Dart | Python | Web/Android

- Built and deployed a cross-platform image-to-PDF application with file selection, PDF generation and share or export functionality.
- Reviewed the application through APK decompilation, ADB temporary-file checks, client-side stress testing, CSP validation and HTTPS handling, then applied input limits, secure temporary-file cleanup, streaming processing and HTTP-header hardening.

EDUCATION

MSc Digital Forensics and Cybersecurity - Distinction

Feb 2025 - Jun 2026

Ghana Institute of Management and Public Administration (GIMPA) | Accra, Ghana

CGPA: 3.75. Relevant areas: IT Auditing, Internet and Mobile Forensics, Cyber Crime and Risk Management, Ethical Hacking, incident response, network forensics and mobile-device acquisition. Capstone practical work: Android Mobile Forensics, covering acquisition, artefact analysis, evidential handling and chain of custody.

BSc Management Information Systems

Sep 2018 - Sep 2022

Ghana Institute of Management and Public Administration (GIMPA) | Accra, Ghana

Relevant modules included Information Security, Human-Computer Interaction, Business Intelligence and Entrepreneurship. Final-year research: *The Impact of Accounting Information Systems on Company Profitability*. Course Representative, 2020-2021.

West African Senior School Certificate (WASSCE)

Sep 2015 - Aug 2018

St. Peter's Senior High School | Kwahu, Ghana

Elective Mathematics, Physics, Chemistry and Geography. Honours included Most Disciplined Student and Best Student in Geography.

ADDITIONAL
BACKGROUND

Experience across information systems, operations, design and technical support adds practical context to my security and software work.

EARLIER EXPERIENCE

Earlier work includes HR operations, graphic design, document processing, technical support and packaging production.

Credentials, Technical Stack and
Earlier Experience

Certifications, technologies and supporting professional experience

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

- ISC2 Certified in Cybersecurity (CC) - November 2025.
- Penetration Testing 2025 - IT Masters / Charles Sturt University - 88% Distinction.
- Cybersecurity Short Course - NCC Education - November to December 2024.
- Introduction to OSINT - Security Blue Team.
- Introduction to Wireless Analysis - Security Blue Team.
- Fundamentals of AI Security - Microsoft Learn - module achievement, 2026.

TOOLS AND TECHNOLOGIES

Security and Forensics: Kali Linux, Metasploit, Burp Suite, Wireshark, Nmap, Magnet AXIOM, Autopsy, libimobiledevice, VirtualBox, OSINT, CDR analysis, vulnerability assessment, incident response, evidence handling, chain of custody and cryptographic hashing.

Development and Web: Next.js, React, TypeScript, JavaScript, Python, Bash, Dart/Flutter, SQL, PostgreSQL, HTML/CSS, Tailwind CSS, Supabase, Vercel, Git/GitHub, Three.js, WebGL and Web Audio API.

Systems and Architecture: Authentication, RBAC, Row-Level Security, secure application design, REST/GraphQL API security concepts, realtime systems, state management, workflow design, UAT, staging and production deployment.

AI and Automation: AI-assisted software development, prompt engineering, context engineering, human-in-the-loop workflows, agentic AI concepts, Base44, n8n and Python automation.

Productivity and Design: Adobe Illustrator, Adobe Photoshop, Canva, Microsoft 365, Advanced Excel, Power Query and VBA.

EARLIER PROFESSIONAL EXPERIENCE

Graphic Designer - Part-time Jun 2015 - Sep 2022

Digital Point | Tesano, Accra

- Prepared legal agreements, reports, corporate communications and branded materials using Adobe Illustrator, Adobe Photoshop and Microsoft Office tools.
- Handled confidential document-processing work for law-enforcement clients, including file digitisation, structured filing and document preparation.
- Provided day-to-day technical support, software troubleshooting and basic system maintenance for office operations.

Graphic Design Assistant - Industrial Attachment Jun 2018 - Sep 2018

FON Packaging Ventures | Spintex, Accra

- Prepared print-ready packaging artwork from client specifications and supported production of embossed design plates.
- Worked with the production team on colour accuracy, progress reporting and client updates during packaging jobs.
